

PROJECT WET

Experts predict that water will be the biggest environmental challenges facing our children as they reach adulthood. Across the world and here in southern Nevada, water is an important issue. These trainings provide objective, experiential, science-based water education scaffolded for our youngest learners up to our graduating high school students.

Start your summer off at the Springs Preserve, learning about the importance of water in our community and earning credits.

6/2/22 - PROJECT WET

6 HOURS/2 C.U.'S (9 am - 4 pm)

Learn more about the importance of water in our daily lives across the world and right here in our own backyard. This course not only raises awareness and understanding of water supply but also focuses on chemical and physical properties of water, sources of water, water quality, water use and management.

6/3/22 - DISCOVER A WATERSHED

3 HOURS/1 C.U. (9 am - 12 pm)

This course takes a multidisciplinary, hands-on approach to the Colorado River's hydrology, geology, geography, agriculture, development, species and landscape. Learn more about how the western states share water across the broad Colorado River watershed and what the future looks like for our water supply. Registration link:
