

Announcing an exciting opportunity for 7th grade science teachers!

The **M-PLANS** (Motivation Planning Lessons to Activate eNgagement in Science) project is currently working with 7th grade science teachers in CCSD and Michigan to design and develop a teacher professional learning (PL) experience to support science teachers in creating a more *motivating* and *engaging* experience for students in their classrooms. The project is seeking additional 7th grade science teachers to join in this work for the 2021-2022 school year. If selected, collaborating teachers will receive a **\$1,000 stipend** for their participation in the following:

- ◆ *Attend M-PLANS PL to learn about student motivation and how to design NGSS-aligned lesson plans that support and encourage student engagement in science.*
- ◆ *Use M-PLANS strategies in one unit to enhance motivationally supportive instruction.*
- ◆ *Document implementation of M-PLANS strategies.*
- ◆ *Participate in teacher and student feedback activities.*
